

Wet 'n' Wash Sponges

Safe on all skin types and will reduce the need for flannels, soaps and wipes

Wet 'n' Wash
SPONGES

Ideal for use in hospitals and nursing homes

Simply moisten with water then apply to the skin
Hygienic with a pH of 5.5 means it is suitable for all skin types

The Wet 'n' Wash Sponges are made of a hypoallergenic polyester sponge and impregnated with a gel soap of high mildness. The sponges moisturise the skin leaving it soft and smooth and allowing a daily use with no risk of irritation.

A Ph of 5.5 helps to keep the natural skin properties intact.

The single use sponges clean the skin gently and protect it in a natural way.

During washing the sponge helps to stimulate blood circulation eliminating dead skin cells and invigorating the skin.
